

Danish Single Cell *Symposium*

Date

October 4, 2018
from 08:30-17:00
followed by dinner
and poster session

Venue

Novo Nordisk Foundation,
Tuborg Havnevej 19, 2900
Hellerup, Denmark

Keynote speakers

- Peter Kharchenko, Harvard University, USA
- John Marioni, European Bioinformatics Institute (EMBL-EBI), UK
- Ed Lein, Allen Institute for Brain Science, USA

Aim of the event

Register now for this one-day symposium on single cell transcriptomics, from sample processing to data analysis. Focus on how single cell transcriptomics can be applied to resolve cell heterogeneity in order to identify distinct cell types in complex tissues, to study tissue differentiation and maturation and to identify mechanisms of pathogenesis and disease progression.

Scientific organizers

- Konstantin Khodosevich, Biotech Research & Innovation Centre, University of Copenhagen
- Tune H Pers, Novo Nordisk Foundation Center for Basic Metabolic Research, University of Copenhagen

Application Deadline
24 August, 2018
